## Product Description

Our Product Introduction

### Disposable Interventional Accessories High Pressure Cardiology Medical 2 Port Manifold

#### Product Overview

This disposable 2-port manifold is specifically designed for high-pressure cardiology interventional procedures, providing reliable performance and sterile safety in critical medical applications.

#### Key Features

- Designed for high-pressure cardiology applications
- Dual-port configuration for versatile procedural use
- Disposable design ensures sterility and prevents cross-contamination
- Compatible with interventional cardiology accessories
- Reliable performance in demanding medical environments

#### Intended Use

Specifically engineered for interventional cardiology procedures requiring high-pressure fluid management and reliable manifold functionality in sterile medical settings.
